

Instant 

Gamers get ready to rumble

The fast, secure, and reliable
Wi-Fi solution

Hewlett Packard
Enterprise

Esports gamers and enthusiasts know better than anyone the importance of a fast, high-performance network. When one small lag or hiccup can mean the difference between winning and losing, the last thing you need is spotty Wi-Fi or slow throughput.

HPE Networking Instant On elevates the gaming experience by providing fast, lag-free, and high-definition video streaming for uninterrupted gaming. With access points including Wi-Fi 6 certified models, gamers get blazing fast Wi-Fi, greater capacity and reduced latency. Let's look at a few of the ways Instant On is primed to help.

Next-generation gaming and virtual reality

Today's multi-player online games, virtual reality apps, and augmented reality have become incredibly sophisticated in realism, resolution, and graphics. Yet these advances require more bandwidth to make it all work seamlessly. Your console constantly sends and receives information from the game's server and every other player, and any disruption to this connection comes at the player's peril. A slow network simply cannot deliver an immersive gaming experience.

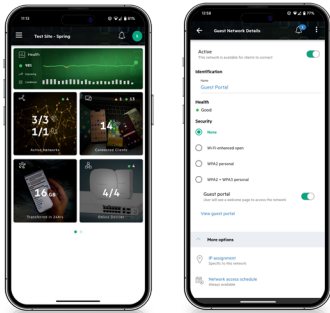

Enter Instant On — ready to deliver game-changing wireless connectivity. The Wi-Fi CERTIFIED 6™ AP25 access point gives you the speed you need — with increased bandwidth, it's more efficient than its predecessors. Whereas Wi-Fi 5 delivered a maximum of 3.5 gigabits per second, the AP25 pushes speeds up to 5.3Gbps. Connections are also more stable than ever as AP25 is able to handle more devices simultaneously. Increased data capacity and throughput ensures the best wireless gaming experience for even the highest-density spaces.

Gaming in every corner

We've established how Instant On can deliver fast performance and bandwidth, but what about coverage? Gamers need room to roam, pace, and plot, and Wi-Fi connectivity that moves with them.

With Instant On's Smart Mesh technology, Wi-Fi dead zones have gone the way of the GameCube. Get extended coverage for every corner of your space, including dense environments, so gamers get the coverage they need while non-players get uninterrupted coverage as well.

**Instant On Mobile App**

An added boost when you need it

Want to up your advantage even further?

Connect directly to an Instant On switch for even faster and more stable performance. Our 1960 switches have up to 176 Gbps of available switching capacity, capable of hosting the best LAN party ever or a helping you clean up in the latest battle royale.

Level up your security game by adding an Instant On Secure Gateway to your network, ensuring uninvited players are kept out of your arena.

A gaming partner and solution you can trust

Experience immersive gaming the way it was meant to be. Get the performance and speed of an Instant On Wi-Fi network.

Learn more by contacting your local HPE Networking Instant On salesperson or reseller today.

Up your game with HPE Networking Instant On

Products

- Instant On Access Point AP25 — blazing fast Wi-Fi 6
- Instant On Switch Series 1930 / 1960 — expand bandwidth with Power Over Ethernet models that eliminate the need for other power sources
- Instant On Secure Gateway SG1004 — the first point of defense for your gaming network

Benefits

- Wi-Fi Certified 6TM speed
- High-speed data processing capacity
- Highest standards of security and interoperability
- Energy-saving
- Simple installation and management
- Non-technical requirements
- Cloud-based, remote management
- Expansive Wi-Fi coverage
